

**Agenda Item:** 16-02 **Request for Adoption of Rule Text Modifications to Respond to RRC Staff Request for “Technical Changes” to Proposed Rules 15A NCAC 02L .0501 through .0515 Risk-Based Corrective Actions for Petroleum Releases from Aboveground Storage Tanks and other Sources; (formerly referred to as Risk-Based Assessment and Corrective Action for Non-UST Petroleum Releases)**

**Explanation:** In accordance with the request for technical changes from RRC, proposed rules 15A NCAC 2L .0501 through .0515 have been modified. The new version of the proposed rules contains various technical changes that the Division is presenting and seek EMC approval prior to formal RRC action. Staff opinion is the technical changes are not substantial therefor do not require republication.

**Recommendation:** That the Environmental Management Commission approve technical changes to the proposed rule.

Attachment A: Technical changes recommendation document from RRC

Attachment B: Original rule text with technical changes included
